WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P16 (DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (I) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

A munitions storage area is located on the northern edge of Kansk, 2 kilometers (km) north of the Kan River (Figure 1). The installation is served by a one km spur of the East Siberian railroad system and streets of the urban complex. Numerous secondary roads link the installation internally. The storage site is secured by a single fence and surrounded by a perimeter firebreak. The entire area is wooded, with clearings for each storage building.

The installation (Figures 2 and 3) encompasses 1,100 acres and contains a total of 109 buildings. It consists of six administrative buildings/barracks, 42 munitions storage buildings, 32 general storage buildings, and 29 support buildings. The lack of good quality photography precludes an evaluation of any apparent changes within the installation. Coverage in [REDACTED] indicates the presence of moderate winter activity.

25X1D

DESCRIPTION OF INSTALLATION

Railroad Service

The installation is served by a rail spur with nine sidings.

Road Service

The installation is served by the urban streets of Kansk.

Aircraft Landing Strips

There are no airfields directly related to the installation. Kansk Airfield is located in the southern section of the city.

Administrative and Troop Housing Area

Area D (Figure 3) has six administrative buildings/barracks and four support buildings.

General Storage Area

Area E contains 32 general storage buildings and 18 support buildings.

Ammunition Storage Area

Area F contains twelve 280- by 75-foot storage buildings, seven 175- by 40-foot storage buildings, six 200- by 50-foot storage buildings, four 300- by 50-foot storage buildings, one 170- by 75-foot storage building, and 12 storage and seven support buildings of undetermined size. All measurements are approximate due to poor film quality.
